

Understand your students' mental health, and help those who need it most

Many students struggle to manage feelings of stress, anxiety, depression and grief. These facets of mental health affect students' behavior and academic outcomes. Without the proper support and interventions, they can even lead to violence, self-harm or suicide.

Despite their best intentions, student services teams are stretched thin. Often supporting hundreds of students each, school counsellors may lack the resources to know for sure which students are suffering and most in need of support.

That's where Securly Aware comes in. Securly Aware is a student safety and wellness solution that provides unprecedented visibility into your students' mental health and wellness. The data provided by Aware can help you understand and meaningfully impact your students' wellness. With Aware, you can:

- Know who's at risk of self-harm, suicide, depression, violence and bullying
- Proactively support students who demonstrate concerning behaviors
- Gain a clear picture of each student's current wellness level
- Intervene quickly when wellness levels drop
- Respond effectively to student safety concerns

"Our trust has almost 20,000 students ... being able to create meaningful reports and see specific information about each case was a massive change in visibility"

Daniel Smart

Technical Service Delivery Manager, Greenwood Academies Trust

How Aware works

Benefits

- Use the resources that you're putting towards student wellness effectively
- Identify depression, grief, anxiety, and other mental health issues efficiently and effectively
- Proactively intervene with your most vulnerable students
- Deter cyberbullying and violence with proactive tools
- Virtually eliminate false positives with our advanced AI
- Centralise and streamline case management with the Respond add-on

Features

Preventative and automated interventions

Wellness Levels

- Know and easily visualise each student's emotional wellbeing—and respond proactively if levels begin to drop.

Wellness Pathways Widget Wellness Intervention

- Present students with mental health resources if their Wellness Levels decline with the Wellness Pathways Widget.

Think Twice Bullying Intervention

- Deter cyberbullying with Think Twice, which analyses student posts and emails to detect hurtful content, then prompts them to reconsider before sending.

Email Recall & File Quarantine

- Automatically recall emails containing violence, bullying and nudity.
- Automatically quarantine images containing nudity.
- Upgrade to also scan video files for pornography.

Comprehensive Scanning of Students' Online Activities

- Google Drive files, Docs, Sheets, Slides, OneDrive files, Canvas (messages, comments, and uploaded images), emails, social media, and web searches are scanned to identify indications of suicide, depression, violence, bullying and nudity.

Flagged Activity Alerts

- Receive real-time alerts of concerning student activities via email, so designated staff can view all alert notifications and activity in their assigned OUs.

Sentiment Analysis

- Detects the actual sentiment behind posts, even when traditionally flagged keywords are not included.

At-Risk AI

- At-Risk AI conducts a nuanced analysis of flagged events, including a student's activity history, to determine a student's Wellness Level.
- Wellness Levels are continuously monitored and updated based on student activity.

Aware Dashboard

- Get a broad picture of student wellness levels, flagged activity trends and detailed information on any student for any time frame.

Minimal False Positives

- Trust the longest-learning AI in education to provide more reliable alerts and minimise alert "noise."

Centralise on a single platform to simplify management

Securly has a suite of other products that work with Aware to help you manage student safety and wellness.

Integrations include:

Get additional context for Aware alerts—and visibility and control over all devices regardless of location—with our industry-leading KSCIE-compliant cloud web filter

Streamline management of Aware alerts and support students more efficiently and effectively

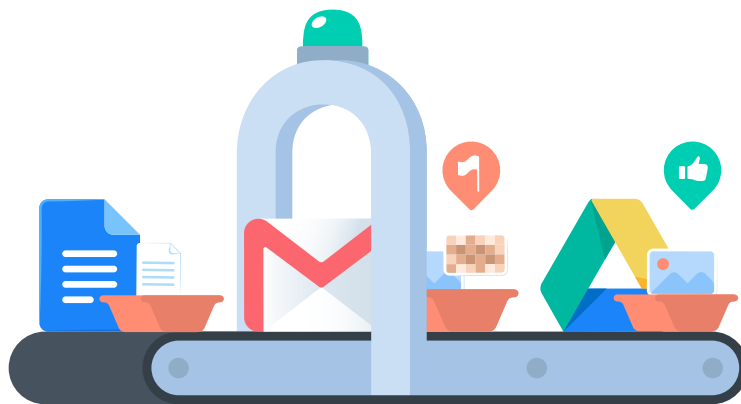

Enlist safety experts to analyse and validate alerts from Aware and escalate responses — before things get worse

Focus your student support services where they're needed most

With Securly Aware, you can identify the students who are most at risk and intervene before the worst happens.

Don't worry about your students' wellness. Know for sure with Aware.
